

## Dr Ok Wack Screenwash-V235

### Super windshield cleaner

This super concentrated solution provides up to 50 litres of windshield washer fluid. Voted “**Product of The Year**” by the motoring press of Europe, it completely eliminates road grime and insect residues from windshields and provides crystal clear vision.

It removes, in a single wipe, what takes conventional cleaners at least 3 to 4 attempts and totally addresses on Lightning fast clear vision – 1:100 concentrate

- The new CW1:100 Super is the strongest CW of all time, and removes dangerous blinding, oily films quicker than ever.
- Given the best CW 1:100 quality, it is the ideal product for frequent drivers with high demands.
- Special action: Increases the life of windscreen wipers.
- Can be mixed with any commercial antifreeze.
- Is also suitable for plastic headlight lenses and fan nozzles.
- Has an anti-limescale formula that binds the limescale in the water, thus preventing clogging of windscreen washer nozzle of the biggest safety issues.

### How To Apply:

Shake the container before use.

The container is moulded into 2 halves, the top half is the 25ml dosing reservoir and the lower section houses the washer fluid. Unscrew the cap slightly. Press on the lower bottle part to fill the dosing head with 25ml of concentrate. Unscrew the cap completely and add the contents of the dosing head to the windscreen washing water. Dilute CW1:100 Classic at a ratio of 1:100. The dosing head contents (25ml) suffices for 2.5 litres of cleaning fluid.

Application in winter seasons: CW1:100 Super can be mixed with common frost protecting agents in the following order: 1. Frost protection agent, 2. Water, 3. CW1:100 Super. Dose CW1:100 Super at a ratio of 1:50 (2 dosing heads for 2.5 litres of washing water).

Note: The frost protection percentage must not exceed 50%.
